

NHS App Support Session

The NHS App lets you view your health record, order repeat prescriptions and access a variety of other healthcare services via your smartphone or computer/tablet.

In order to access these online services, you must create an NHS online account and verify your identity to get full access.

You will need to access your **email address**, have a **mobile phone** and **photographic ID**. Accepted ID: passport and driving licence. You cannot use travel cards or bus passes.

You can prove who you are without photo ID by registering for online access with your GP Practice.

The NHS App has had a big update!

You might notice things look a little different, that's because there's now a fresh new design, improved access, and some great new features to make managing your health even easier.

To help you get to grips with the changes, the NHS App Support Team have created a series of short, easy-to-follow videos.

Watch them here::

Whether you're new to the app or a regular user these quick guides are really helpful.

Take a look and feel more confident using the NHS App!

NEED HELP? WE'RE HERE FOR YOU!

As the app has changed, we can support with any queries at the drop in session.

**Woodfield Medical Centre,
Freshney Green Primary Care Centre, Grimsby**
Tuesday 16th June at 10:00am - 12:00pm

**DROP IN
ALL WELCOME!**

Your health. Your App. We're here to help.
